

The picture shows the company buildings of AGT-Lighting. In the left building the production is placed. The other building is the residential building for the employees of AGT-Lighting.

Our friendly ladies take care for export matters, purchase and production planning.

A view into the mechanical production floor. Mostly PAR cans and brackets of different sizes can be seen.

Rolling frame grinding machines on the production floor. Holes for the bracket

Grinding machine. Before printing the parts, the products added the different background

The assembly line. Mostly PCB assembly is done here. On the line our 432 LED PCBs are

Assembly of 1W LED Gooseneck Desk Lamp.
